AYUSH ROY

Backend / Full-Stack Software Engineer

ayushroy.dev@gmail.com | GitHub | Portfolio | LinkedIn Bhubaneswar, Odisha, India

B.Tech CSCE student at KIIT (2027) building backend-heavy product systems with Python, TypeScript, PostgreSQL, Redis, realtime APIs, automated testing, Docker, and applied ML.

EXPERIENCE & SELECTION

KPIT Technologies - Associate Engineer 2027 (Campus Selection)

SELECTED AUG 2026

Selected through KIIT campus recruitment; Letter of Intent accepted. Role commencement and onboarding are pending, so this is listed as a selection rather than current employment.

Bharat Sanchar Nigam Limited (BSNL) - Telecom & Data Network Intern

JUN 2026

Completed a 4-week RGMTTC-certified hybrid program in Chennai covering telecom infrastructure, data-network systems, and operational concepts.

SELECTED ENGINEERING PROJECTS

CandidateX - Candidate Capability Intelligence

SEP 2026 - PRESENT

github.com/yorayriniwnl/CandidateX | Python, FastAPI, Next.js, PostgreSQL, Redis, Docker

- Built a research prototype for synthetic candidate documents and selected public technical evidence, producing provenance-linked evidence graphs, role-aware capability signals, contradiction diagnostics, and targeted interview probes.
- Implemented static repository analysis without executing untrusted code; the repository documents 131 backend unit, golden, property, security, database, and theorem tests plus GitHub Actions validation.
- Kept experiment provenance explicit: the 4,800-sample repository ablation is separate from the paper's 28,800 synthetic candidate-role benchmark; neither is claimed as real-world hiring validity.

Yor Talks V2 - Realtime Social Platform

2026

github.com/yorayriniwnl/yor-talksv2 | React, Vite, Express 5, Socket.IO, PostgreSQL, Drizzle, Redis

- Engineered authenticated REST and Socket.IO workflows, PostgreSQL/Drizzle persistence, Redis-backed queues, messaging, notifications, privacy controls, and server-owned authorization.
- Added regression coverage for audience visibility, stale-cache authorization, session boundaries, database migrations, failure handling, and browser flows; production deployment remains explicitly gated on external infrastructure checks.

Yor Token Usage - Privacy-Aware AI Usage Analytics

APR 2026 - PRESENT

github.com/yorayriniwnl/Yor_Token_Usage | JavaScript, Chrome MV3, Node.js, PostgreSQL, Redis, Playwright

- Built a local-first Manifest V3 extension estimating token usage across ChatGPT, Claude, Gemini, Perplexity, and Grok without uploading prompt text.
- Added optional PostgreSQL/Redis sync, OIDC/JWKS architecture, idempotent batching, Playwright regressions, and explicit calibration/error-bound reporting.

EDUCATION

KIIT Deemed University - B.Tech, Computer Science & Communication Engineering

2023 - 2027

Relevant coursework: Data Structures & Algorithms, Operating Systems, DBMS, Computer Networks, Object-Oriented Programming.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, SQL | Foundational: Java, C, C++
Backend & Databases: FastAPI, Flask, Node.js, Express, PostgreSQL, Redis, SQLAlchemy, REST APIs, WebSocket, Socket.IO
Frontend: React, Next.js, Vite, HTML/CSS, Tailwind CSS
Testing: Pytest, Playwright, Vitest, unit, integration, E2E testing
DevOps & Tooling: Docker, Docker Compose, Git, GitHub Actions, Linux, Vercel
Applied ML: OpenCV, scikit-learn, SVM, feature engineering, model evaluation
